LogicTree's Masoud Loghmani Named Finalist for the Tech Council of Maryland's CIO&CTOLive! Awards

LogicTree Co-Founder to be Honored November 15th

MARYLAND SCIENCE & TECHNOLOGY CENTER, BOWIE, MD, November 14, 2006 — LogicTree Corp. today announced that the Tech Council of Maryland has named Co-Founder and Chief Technology Officer (CTO) Masoud Loghmani as a finalist for the CIO&CTOLive! Awards. The award ceremony, to be held on November 15, 2006, will honor the achievements of the most influential CTO, CIO and senior IT leaders in the Mid-Atlantic region.

"We are incredibly proud of Masoud's accomplishments with LogicTree and are thrilled that he is being recognized as a finalist for this award," remarked LogicTree's CEO, Fred Korangy. "I can't imagine a greater challenge than being a CTO at a growing technology firm during the past few years, but Masoud's perseverance, broad vision, and ability to engage the market has helped us grow into the company we are today."

Loghmani developed the vision of the first truly speech and multi-modal communications platform capable of simultaneous speech/data interactions. He has also been a thought leader in the information services market identifying how players such as Directory Assistance service providers, Internet Yellow Pages, Mobile Operators, or online portals can overcome growth and competitive challenges by delivering Multi-Modal applications that are easy to use.

Through his leadership, LogicTree's information services division, BTSLogic, has grown to be a formidable player which continues to deliver open and standards-based solutions designed to meet the needs of information service players now as well as in the converged networks of tomorrow (IMS).

Loghmani is one of six finalists. The winner of the CIO&CTOLive! Award will be announced along with the finalists at the event. "This event is the one gathering place for business innovators and top industry leaders to recognize the amazing minds behind corporate internal information systems," says Julie Coons, CEO of TCM.

The announcement of Loghmani being named a finalist comes on the heels of LogicTree being named as the 76th fastest growing technology company on Deloitte's Fast 500 Technology list.

About LogicTree Corp.

LogicTree provides contact center solutions that use speech recognition to automate complex customer service tasks. The BTSLogic Information Services Division provides total solutions to service providers and telecom carriers' world wide.
