LogicTree Deploys First Speech-Enabled Spanish 511 System

SunGuide Southeast Florida 511 Provides Full Service to Spanish Speakers

MARYLAND SCIENCE & TECHNOLOGY CENTER, BOWIE, MD – LogicTree Corporation (www.logictree.com), the leading provider of speech-enabled 511 traveler information systems, today announced that they have successfully implemented the first 511 system in the United States that recognizes and responds to callers' natural speech in Spanish.

“This was a small step for LogicTree and a big step for the 511 movement,” said Fred Korangy, CEO of LogicTree. “The versatility of our TravelerSpeak™ 511 platform allowed us to quickly extend the English system to Spanish speakers and increase the reach of the service.”

LogicTree's TravelerSpeak™ 511 is a speech-enabled service that allows callers to hear travel information including real-time road conditions, estimated travel times, emergency messages and traffic accident information. The Spanish version of the SunGuide Southeast Florida 511 system (www.sunguide.org) covers the southern region of Florida including Miami-Dade, Broward and Palm Beach counties.

“Florida has led the nation in 511 innovation and we are proud to be the first to offer a full Spanish 511 service,” said Jesus Martinez, ITS Administrator of the Florida Department of Transportation, District 6. “This system allows us to give our Spanish-speaking callers the same high quality service as our English-speaking callers.”

LogicTree's TravelerSpeak™ 511 powers two other 511 systems in Florida. The Statewide 511 service covers all interstates within the state and Central Florida 511 covers Orlando and the I-4 Central Florida corridor. LogicTree has also implemented 511 systems in Virginia, North Carolina, Missouri, and New Jersey. The US Federal Communications Commission (FCC) reserved the “511” telephone code in 2000. As of April, the nation had 28 active 511 systems. Information about other 511 systems can be found at www.deploy511.org.

About LogicTree (www.logictree.com)

LogicTree is the leader in providing natural speech-enabled solutions for complex call center applications. In the transit industry, LogicTree offers a full suite of integrated solutions, including 511, transit trip planning, routes and schedules information, and

paratransit trip scheduling. LogicTree is headquartered in Maryland with offices in Denmark.
